RAMPAGE WATER-RESISTANT BLOX RODENTICIDE

**KILLS RATS & MICE
SOLID
Kills Norway Rats, Roof Rats and House Mice**

For Indoor Use Only

Rats and mice may consume a lethal dose in a single feeding, with first dead rodents appearing one or two days after bait consumption. Rodents cease feeding after consuming a toxic dose in a single night's feeding. The bait in these blox kills anticoagulant-resistant rats and mice.

REGISTRATION NO.: **27365** PEST CONTROL PRODUCTS ACT

COMMERCIAL

WARNING

POISON

GUARANTEE

Bromethalin.....0.01%

* Contains the bittering agent Denatonium Benzoate
Contains the preservative, potassium sorbate at 1.0%.
Warning, contains the allergens wheat, soya lecithin and milk.

READ THE LABEL BEFORE USING

(see back panel for additional precautionary statements)

KEEP OUT OF REACH OF CHILDREN

Only to be used by certified pest control operators, farmers and persons authorized in government-approved pest control programs.

NET CONTENTS: 1.92 kg (128 x 15g)

Manufactured by: Motomco, 3699 Kinsman Blvd., Madison, WI 53704 U.S.A.

Telephone: 608-241-0202

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN, PETS, LIVESTOCK AND WILDLIFE. All handlers must wear long-sleeved shirt and long pants, shoes plus socks, and chemical resistant gloves when handling this product.

KEEP OUT OF REACH OF CHILDREN, PETS AND LIVESTOCK. May be harmful or fatal if swallowed or absorbed through the skin. Chemical resistant gloves must be worn while handling product and when disposing of dead rodents, unconsumed bait and empty containers. Avoid contact with eyes, skin or clothing. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Wash skin thoroughly with soap and water after handling. Wash contaminated clothing, separately from other laundry, with soap and hot water before reuse. **KEEP AWAY FROM FEED AND FOODSTUFFS.**

FIRST AID: If in eyes, hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. If on skin or clothing, take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice. For all cases of human ingestion, immediately notify a physician or poison control centre. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person. If pet or livestock poisoning is suspected, immediately contact a veterinarian. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: RAMPAGE Water-Resistant Blox Rodenticide is not an anticoagulant type of rodenticide. If ingested, limit absorption by either emesis or gastric lavage. Sublethal symptoms, if present, would be the result of cerebral edema and should be treated accordingly through administration of an osmotic diuretic and corticosteroid.

ENVIRONMENTAL HAZARDS: This product is toxic to fish, birds and wildlife. Keep out of lakes, rivers, streams or ponds.

DIRECTIONS FOR USE: Use bait to control the Norway rat (*Rattus norvegicus*), Roof rat (*Rattus rattus*), and House mouse (*Mus musculus*) indoors only. This product is not to be used outdoors or in areas near farm wells or water reservoirs or in areas where there is a possibility of contaminating sources of drinking water.

Users should remove clothing immediately if pesticide gets inside. Then wash skin thoroughly and put on clean clothing.

Food Processing, Food Manufacturing, Food Storage and Food Service Areas:

For areas not directly related to food processing: Use only in non-food or non-feed area where feed, food, packaging and handling equipment are never opened or exposed. For areas where feed or food is processed, served, or stored: In meat and food processing

plants (processing areas), use only when plant is not in operation. Remove or cover all food, packaging material and utensils before placing bait in baiting stations. Remove all baits and dead rodents before reuse of the plant (processing areas include storage and service).

USE LIMITATIONS: Bait **MUST** be placed either in tamper-resistant bait stations or in locations not accessible to children, pets, livestock or non-target wildlife. **DO NOT** place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food.

Bait stations (**tier 3**) used for the placement of rodenticide bait indoors, in locations not accessible to pets or livestock must have the following characteristics: (1) be constructed of high-strength material (e.g., metal or injection molded plastic) and resistant to destruction by children; (2) have an entrance designed so that children cannot reach the bait; (3) have internal structure which prevents bait from being shaken loose; (4) have an access panel that fastens securely and locks (e.g., metal screw or padlock); and (5) bear the product name, active ingredient, guarantee, registration number, “WARNING POISON”, and the skull and crossbones symbol.

Bait stations (**tier 2**) used for the placement of rodenticide bait indoors, in locations accessible to pets or livestock must have the following characteristics, in addition to those outlined above for tier 3 bait stations: (1) resistant to destruction by non-target animals; and (2) have an entrance designed so that non-target animals cannot reach bait.

SELECTION OF TREATMENT AREAS: Determine areas where rats and/or mice will most likely find and consume the bait. Generally, these areas are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where rodents or their signs have been observed. Remove as much food as possible.

APPLICATION DIRECTIONS:

NORWAY AND ROOF RATS: Apply 2 to 12 pieces of RAMPAGE Water-Resistant Blox Rodenticide per placement (usually at intervals of 6 to 10 metres). Adjust the amount of bait applied to the level of rat feeding expected at each bait placement.

HOUSE MICE: Apply 1 piece of RAMPAGE Water-Resistant Blox Rodenticide per placement. Space placements at intervals of 2 to 4 metres in infested areas. Two pieces may be used at points of extremely high mouse activity.

BAITING STRATEGY: Highest bait consumption is expected to occur on the first day or two after treatment begins. After several days, inspect the placement and replenish bait at sites where there is evidence of heavy feeding or where there is continued evidence of rodent activity. Normally, the volume of bait consumed will be significantly less with bromethalin baits than with anticoagulant baits. Although one night’s feeding will usually provide a lethal dose, maintain bait for at least one week to provide all rodents a chance

to feed on the bait. Continue baiting until all signs of feeding have ceased. To discourage reinfestation, limit sources of rodent food, water and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

DISPOSAL: Do not reuse empty container. Dispose of unused or spoiled bait in accordance with local requirements. Follow provincial instructions for any required cleaning of the container prior to its disposal. Make the empty container unsuitable for further use. Dispose of the container in accordance with provincial requirements. For more information on the disposal of unused, unwanted product, contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean up of spills.

Rodent Disposal: Dispose of dead rodents in garbage or by burying.

STORAGE: Store in a cool, dry place away from other chemicals and food or feed. Store product not in use, in original container, in a secure location inaccessible to children and non-target animals.

NOTICE TO USER: This pest control product is to be used only in accordance with the directions on the label. It is an offence under the *Pest Control Products Act* to use this product in a way that is inconsistent with the directions on the label. The user assumes the risk to persons or property that arises from any such use of this product.
