## HOW TO USE

Set Snap Trap by squeezing the back side as shown. While baiting isn't required, the use of TOMCAT Mouse Attractant is recommended. Place a small pencil eraser-sized amount of attractant onto the back corner of the yellow tongue.

Place against walls where mice travel. For best success, place between a mouse's nesting place and food source.

For mouse disposal, just squeeze the back of the trap - your hands never touch the mouse. Now it's set and ready to be used again.
