

BAIT STATIONS

TAMPER-RESISTANT STATIONS FOR BAIT SAFETY AND BIOSECURITY

The EPA requires the use of bait stations for all outdoor, above ground applications and stations are a critical part of your rodent control and Biosecurity program. Tomcat Bait Stations provide security by keeping bait out of reach of children, livestock and non-target animals. Bait Stations increase the effectiveness of any bait by protecting it from the elements and providing a sheltered area where rodents like to feed. Tomcat stations come in a variety of different sizes and can be used for either rats or mice.

- Titan, Vertical and Bullet stations all meet EPA Tier 1 Standards
- Available in a wide variety of sizes and designs for any baiting situation
- Rugged, heavy duty construction will last for years
- Can be used indoors and out for either rats or mice
