1
Open package and separate PROWLER Glue Boards.

2
Place PROWLER Glue Boards in areas (such as along walls) where rodents or insects will most likely cross over them as they move from hiding places to feeding places.

3
After use, simply dispose of the entire board.

VALUE-PACK

PROWLER™ Glue Boards work without poison or mechanical apparatus. Glue Boards take advantage of a rodent's natural tendency to run along walls. When a rodent runs onto the board, it will get stuck. Simply dispose of the entire glue board.

APPLICATION DIRECTIONS: Place PROWLER Glue Boards for rats at 10'-15' foot intervals.

Las trampas encoladas PROWLER funcionan sin veneno ni equipos mecánicos. Las trampas encoladas aprovechan la tendencia natural de un roedor de correr a lo largo de las paredes. Cuando el roedor corre sobre la bandeja, quedará adherido. Simplemente deséchela toda la trampa encolada.

INSTRUCCIONES DE APLICACIÓN: Coloque las trampas encoladas PROWLER para ratas a intervalos de 10 a 15 pies.

IMPORTANT: • Protect in dusty areas by leaning boards against wall and place PROWLER Glue Board between board and wall.
• Avoid using PROWLER Glue Boards in wet areas. Dispose of rodent and glue board completely. Do not place glue boards where there is a possibility of birds or non-target animals coming in contact with adhesive.
• If accidentally contacted, remove with mineral spirits followed by washing with warm water and mild detergent.

IMPORTANTE:

• Protéjelas en áreas polvorientas apoyando tablas de madera contra la pared y colocando las trampas encoladas PROWLER entre la tabla de madera y la pared.
• Evite usar las trampas PROWLER en áreas húmedas. Deséchelas completamente el roedor y la trampa encolada. No coloque trampas encoladas cuando exista la posibilidad de que pájaros u otros animales que no se desean atrapen entren en contacto con el adhesivo.
• En caso de entrar en contacto accidentalmente con la trampa, quite con alcoholes minerales, seguido de un lavado con agua caliente y detergente suave.
